

## **IST 263 Project Milestone 5 – Skeleton Site**

**Name: Kerri Riley**

### **Description:**

For the homepage I am going to explain the Syracuse University Literacy Corps program, a reciprocal learning program in which tutors offer literacy support in urban schools. This will include the program's history and importance and teasers to the next two pages. On the second page, I will focus on my individual experiences doing community service for Literacy Corps. I will talk about my placement, my experiences with the students and staff, transportation, and my responsibilities. On the third page I will explore the different skills I gained through my involvement in this program. I will include an unordered list of skills and connect these acquired skills to my experiences.
